1.0 **GENERAL**

1.1 **Related UBC Guidelines**

.1 Section 03 00 00 Concrete
.2 Section 07 00 10 Building Envelope – General Requirements
.3 Section 07 40 00 Roofing and Siding Panels
.4 Section 07 62 00 Sheet Metal Flashing and Trim

1.2 **Co-ordination Requirements**

.1 Building Envelope Consultant.

1.3 **Performance Standards**

.1 Reinforcing and other steel requiring corrosion protection shall be embedded so that the minimum depth of concrete cover is in all cases greater than 40 mm.

.2 Stainless steel is to be used where reinforcement or other embedded metal has less cover than 40 mm.

.3 The concrete mix and placement and curing procedures are to be designed to provide the required quality of surface appearance and texture.

.4 Concrete structure that penetrates through the building enclosure constitutes a large thermal bridge and requires an energy audit.

1.4 **Quality Control and Assurance**

.1 Submittals
   .1 Construct mock-ups of all assemblies to check contractor’s procedures.
   .2 Contractor to submit mix designs and placement procedures for architectural panels.

2.0 **MATERIALS**

2.1 **Performance Requirements**

.1 Maintenance
   .1 No maintenance for 100 years, except for cleaning.

2.2 **Prescriptive Requirements**

.1 Materials
   .1 Components
      .1 Concrete components to be certified compliant to CSA A23.1 for alkali aggregate reactivity.

   .2 Finishes
      .1 Surfaces of exterior concrete to be treated with opaque paint coatings or a clear silane/siloxane type sealer after final cleaning.

      .2 Surfaces of exterior concrete near grade to be treated with a clear anti-graffiti type coating where required by UBC. Anti-graffiti coating systems with a wax top coat are preferred. Contact Technical Services, UBC Building Operations – Phone: 604-822-9510.
